Moving Average 200 days vs 50 days vs Original Closing Price

Original price vs Predicted price

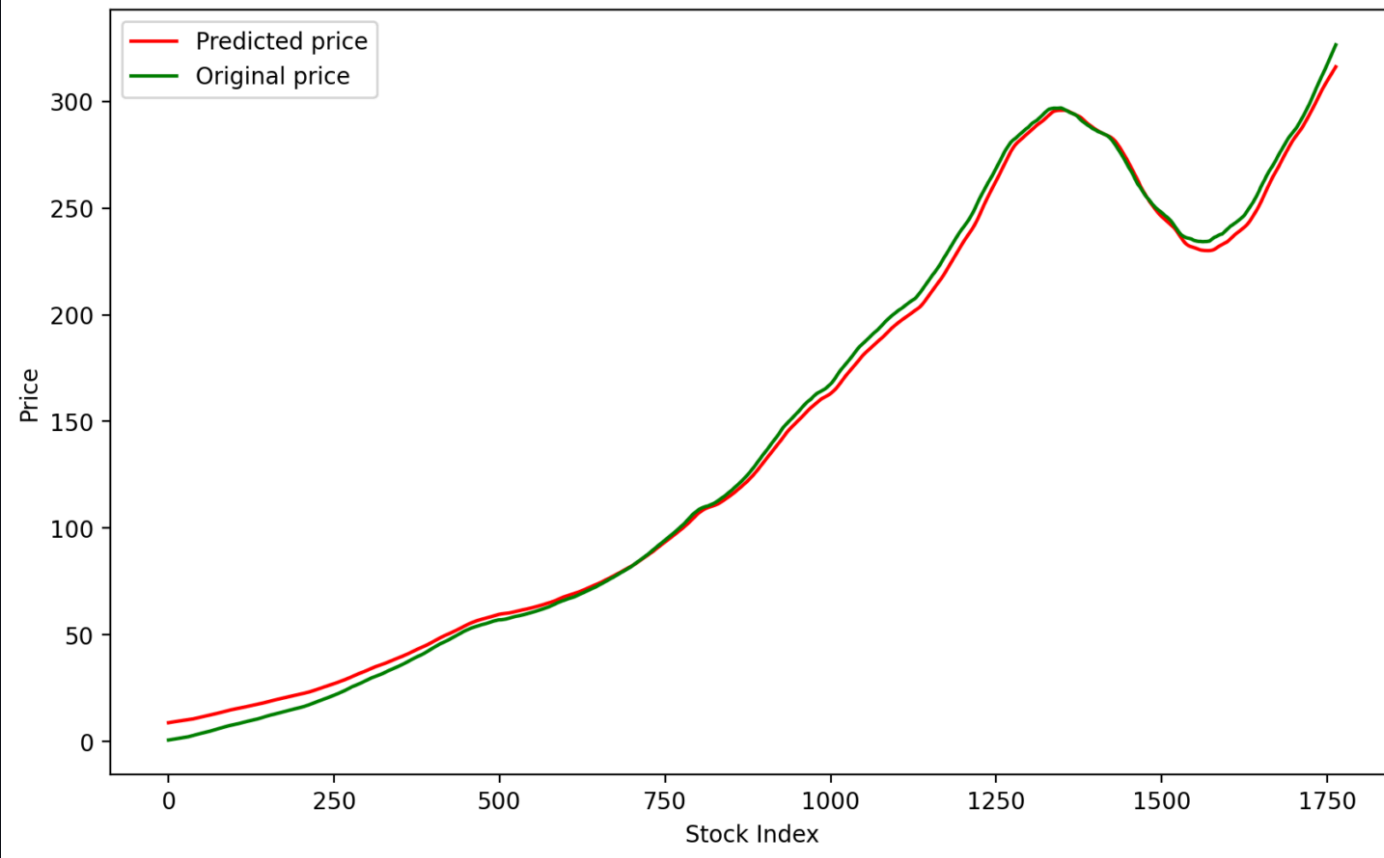

The r2 score of the model is

0.9844648691416579

The mean squared error of our model is

11.430299810188243

Original MVA_200 Price vs Predicted price

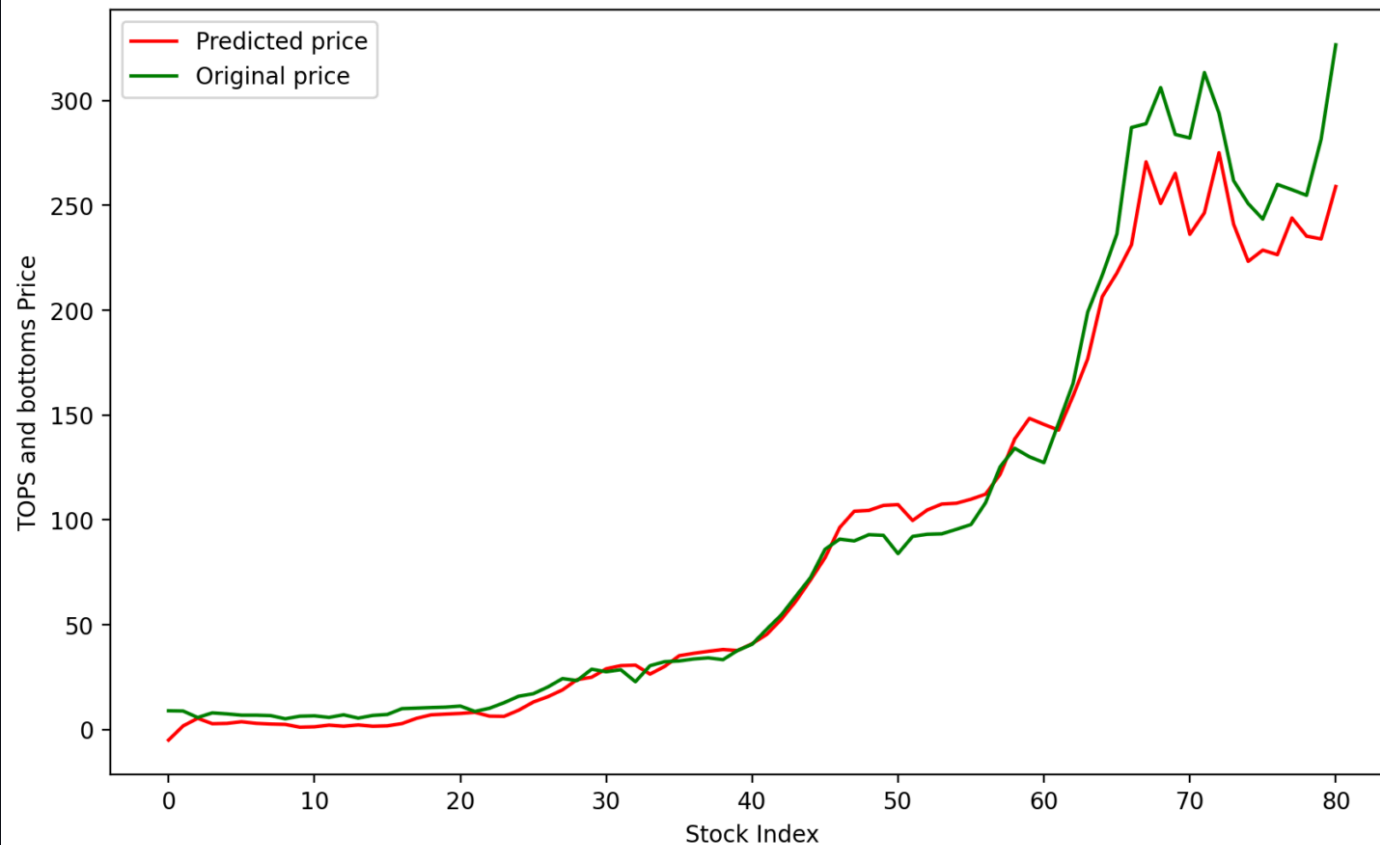

The r2 score of the model is

0.9980013153036666

The mean squared error of our model is

4.612743009107853

Tops And Bottoms of original MVA_200 and Predicted

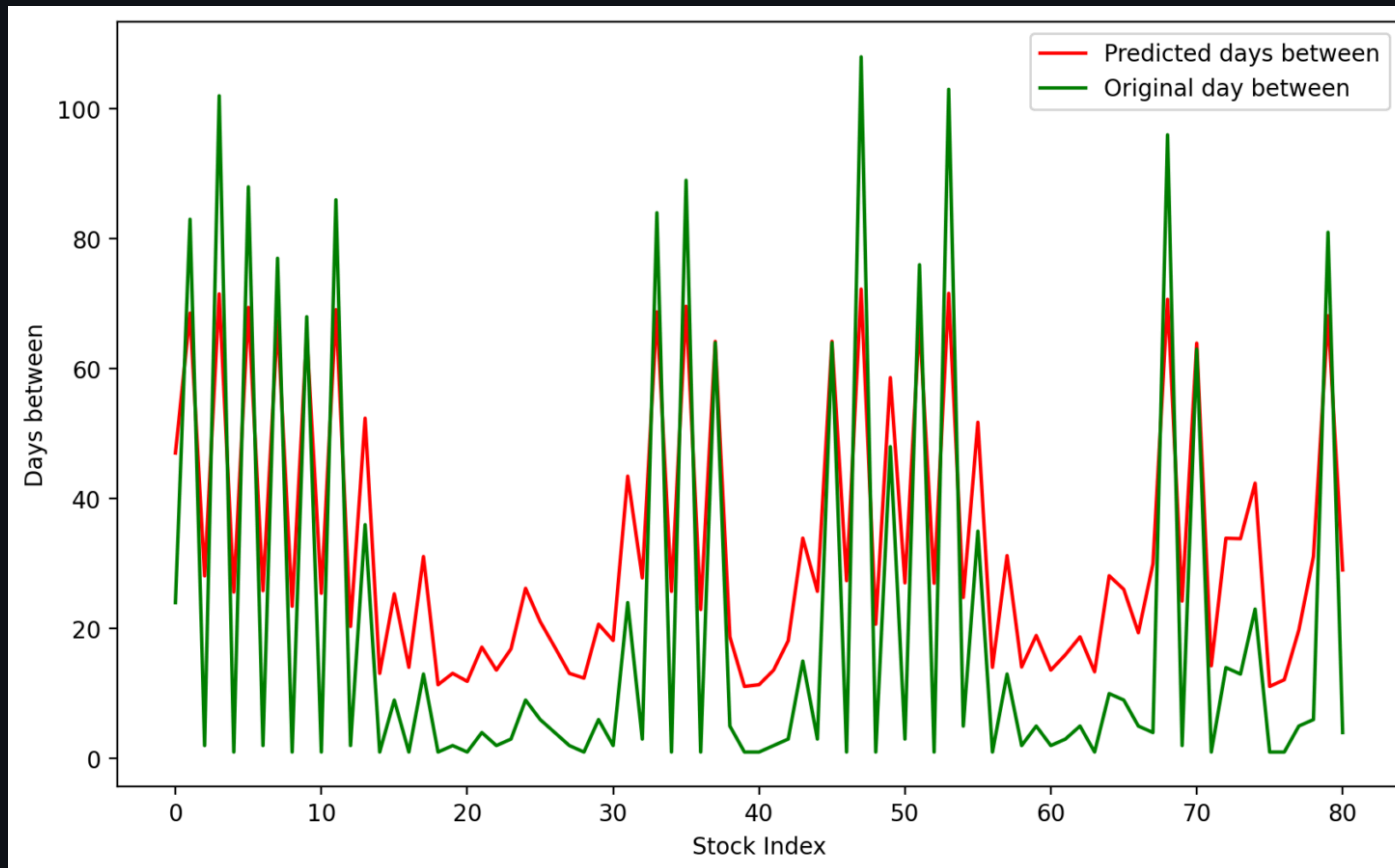

The r2 score of the model is

0.9664108280940108

The mean squared error of our model is

18.65902523655598

Days between extremes with respect to MVA_200 and Predicted

The r2 score of the model is

0.6878638362183537

The mean squared error of our model is

18.02529191493601
